Site is a low gray building with small  
thick opaque windows and a chimney on one end.  
is cool and dark, but artificially lighted.  
some light bulbs covered with wire screening.  
The walls are painted metal. People in  
this building are wearing belted gray coveralls,  
but one is driving a small motorized  
vehicle with a wheeled pallet attached.  
Cylindrical blunt nose metal  
chassis is stuck on the pallet.

The inside of these canisters <sup>like paper</sup> contains a  
jumble of wires. Their destination is the  
hold of a ship and they are loaded  
by mesh netting and crane.

<sup>As for</sup> One of the objects is  
presumed to be with a group of men  
in military dress - BDU-type, who are  
gathered around a barrelled wagon.
